Exclusive: Top ISPs poised to adopt graduated response to piracy

by Greg Sandoval

Some of the country’s largest Internet service providers are poised to leap into the antipiracy fight in a significant way.

After years of negotiations, a group of bandwidth providers that includes AT&T, Comcast, and Verizon are closer than ever to striking a deal with media and entertainment companies that would call for them to establish new and tougher punishments for customers who refuse to stop using their networks to pirate films, music and other intellectual property, multiple sources told CNET.

The sources cautioned that a final agreement has yet to be signed and that the partnership could still unravel but added that at this point a deal is within reach and is on track to be unveiled sometime next month.

'Comodo Hacker' Says He Acted Alone

The plot thickens: In an effort to back up his claims, alleged hacker dumps apparent evidence of pilfered database from breached Comodo reseller, as well as Mozilla add-on site certificate

By Kelly Jackson Higgins InformationWeek
April 09, 2011 12:00 AM

Comodo, a website certificate authority, revealed that nine SSL certificates were issued for fraudulent websites posing as domains for high-profile sites. Security researchers hope the incident will call attention to a certificate process they say is riddled with holes.
US company 'helped' Egypt block web

Egypt's crackdown on web users allegedly aided by US company's product.

Last Modified: 06 Feb 2011 03:23 GMT

When Egypt's uprising began nearly two weeks ago, there was a near-total internet blackout.

But exactly how was access cut off?

An American advocacy group called Free Press says it has uncovered a link to a California-based technology company that allegedly sold the Egyptian government equipment allowing it to track online activity.

Al Jazeera's Rob Reynolds reports.
